

TASTER AND INFORMATION SESSION FOR SECONDARY TEACHERS AND SENIOR LEADERS

We can support you in enhancing the computing curriculum within schools

The aim of the session will be to give an overview of what the National Centre for Computing Education (NCCE) has to offer schools.

We will focus on Subject Matter Expert (SME) support and bursaries available, the wide range of CPD opportunities available and bursaries attached, the different courses and non-specialist pathways and the physical computing available to hire and attached CPD.

The session will continue with a snapshot taster of one of the courses available **'Introduction to Algorithms, Programming and Data'** to give participants an insight into what a course may look like and include.

Date: Monday 27th September 2021, 16:00-17:30

Location: Haybridge High School and Sixth Form,
Brake Ln, Hagley, Stourbridge DY8 2XS
